## NOTICE OF NEW POLICY TO ALL WATER USERS

January 22, 2010

At its January 13<sup>th</sup> monthly meeting the Board of Directors authorized a one year demonstration policy allowing individual landowners to pump groundwater in advance of their needs in order to help meet their summertime peaking demands.

If the District cannot store (build an account) in-District, the water pumped into the district's system will be pumped to the State Water Project facilities (i.e. San Luis Reservoir) for storage until needed later in the year.

Storage outside of the District will cost on the order of \$30.00/af, primarily for energy both out and back in, in addition to on-farm pumping costs.

This is a simple summary description of the policy. If you are interested and have wells connected to the District facilities please contact us for a more detailed description of the policy.

/s/ Will Boschman  
General Manager
